

MARINE ANTENNA RANGE

The GME Antenna System Features

- Plug 'N' Play selection of interchangeable bases and whips to complement any boat or installation scenario.
- UV stabilised fibreglass whips, with glass impregnated.
- Ground plane independent design to suit fibreglass, plate alloy or wooden vessels.

Colour Coding

GME Antenna Bases and Whips are uniquely identified by colour coded tabs, ensuring that only the matching whip is attached to the base. This feature is particularly beneficial on vessels with multiple antennas.
